Cloud Solutions

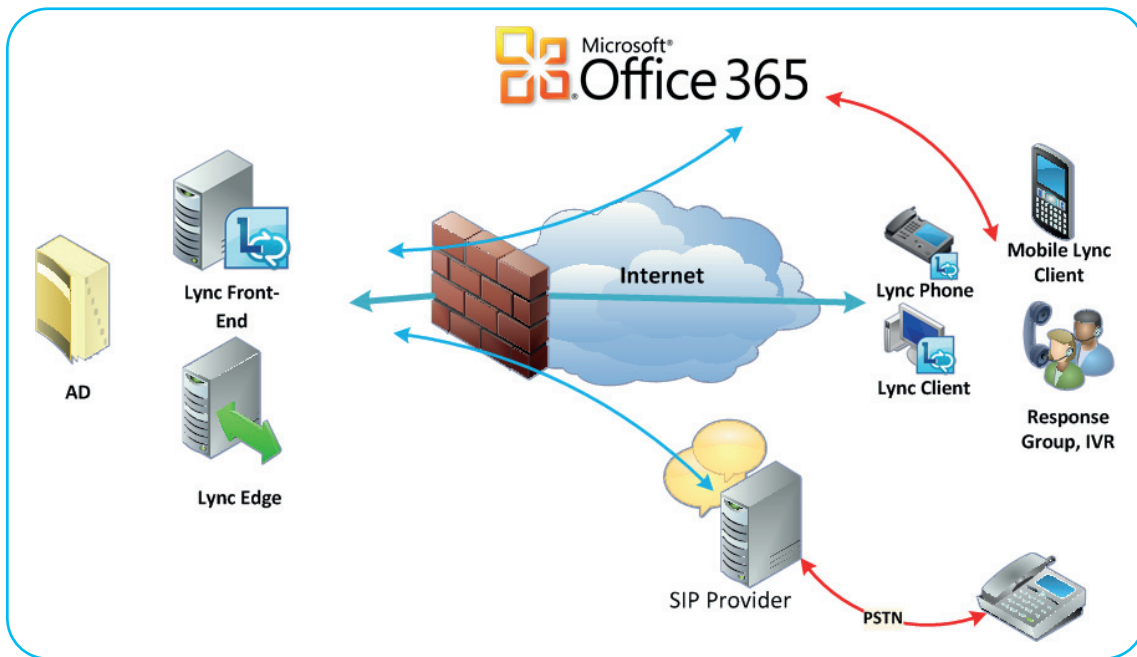

Cloud Solutions

Your complete Office in the cloud As a Microsoft Cloud Accelerate partner, CWL Systems has the skills and experience to help you with everything from procuring Microsoft Office 365 through to deployments, migrations and building custom solutions.

Office 365 brings together the power of the familiar Office applications with business class email (powered by Exchange Online), document sharing (powered by SharePoint Online), and instant messaging and video conferencing (powered by Lync Online).

Everything works seamlessly together to give you the best productivity experience across your devices - from PCs to smartphones to tablets. Because it is a cloud-based service hosted by Microsoft, you always get the latest technology without the need to upgrade your servers and it comes with virus/malware protection, automatic backup, and 99.9% uptime guarantee with a financially-backed service level agreement

Standard Features:

Email 50GB storage for each user, Personalize and share Calendar / Documents, Anywhere access, Security, Instant messaging and conferencing, File sharing, Office web Apps.

Optional Features:

Share securely with customers and partners, Use a team site to manage projects, Store and organize important documents, Create Website.

Windows Azure Infrastructure Services (IaaS) and other enterprise technologies such as Azure Active Directory, Recovery Services, and PaaS Services such as SQL Database and Storage.

Standard Features:

Azure global datacenters:

24 x 7 x 365 support Over 1 billion customers, 20 million businesses 90 markets world-wide 280 years of combined industry experience in infrastructure, security, product dev, and global ops

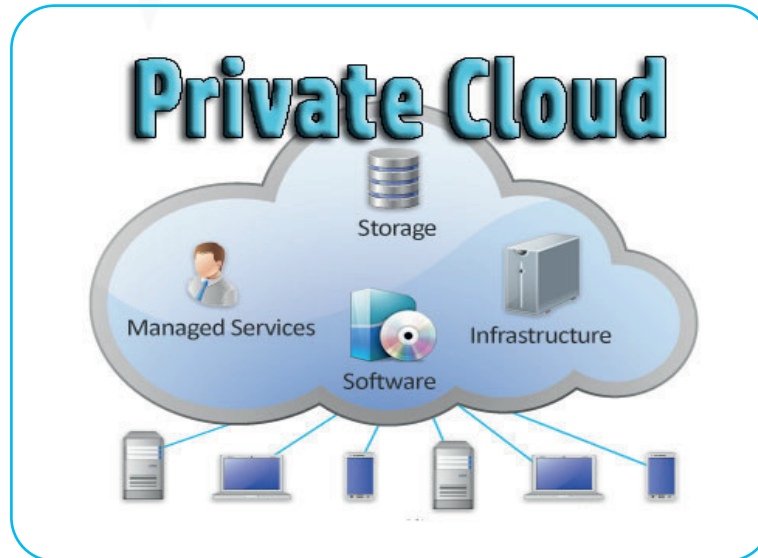

Azure is ideal when you need to:

- Get apps up and running fast
- Scale instantly
- Pay only for what you use
- Leverage enterprise-level security
