# Business-critical printing you can count on, time after time.

Nuance® Output Manager™

NUANCE

Does your organization have a need for business process management solution?

Organizations of all sizes in all industries need to be able to control their print management costs, while at the same time increase efficiency and secure their most sensitive documents to ensure their data isn't exposed to security and compliance risks.

Overuse of print in an office environment can have a negative impact on the bottom line. Managing printers and print servers can be challenging and monotonous for IT departments.

Sensitive information sitting on a printer or leaving the organization can expose a company to compliance risk and even costly data leaks—leaving your content and your company unprotected. Whether stored digitally, at a printer or in transit, your mission-critical documents must be protected. Not only do organizations need to avoid risk and reduce costs, they need to be able to do their job more efficiently and maintain business continuity.

Organizations who do not secure their document processes are left with the potential for security breaches, lost revenue and jeopardize their reputation.

Print mission-critical documents
to the right place at the right time

Simply put, your print jobs must print out correctly every time. Output Manager seamlessly transforms and delivers print streams from line of business systems so every mission-critical job is securely printed – when and where you need it.

The availability of printed documents can often make the difference between business moving and business stopping. That's why organizations that rely on printed output rely on Output Manager. From loan applications and financial statements to bills and patient discharge forms, you can feel confident in the availability and security of your mission-critical jobs with secure print release, authorization and authentication options from Nuance Output Manager.

The costs of security breaches add up:

90%
of surveyed organizations had at least one security breach in the past year*

72%
of breaches were caused by malicious attacks and negligence**

$3.79M
Average organizational cost of a data breach is $3.79 million**

*Ponemon Institute, March 2014

Gain control of your business process output

Whether you want to simplify information workflow, secure confidential information, reduce the costs associated with printing and delivery, consolidate output management systems, migrate from legacy printers, or recover costs through auditing and reporting, Nuance Output Manager can help, while reducing your administrative overhead and saving money. Unlimited scalability and modularity mean obtaining the solution you need so all business process output is in your grasp! If it is important to secure your private information and prevent sensitive information from being printed, then Output Manager is the solution for you.

Output Manager is designed to save your organization time and money by providing effective controls over all enterprise output. What's more, the solution scales to fit any sized organization and can be customized to fit your organization's specific needs.

1
Advanced security

Advanced security and compliance features ensure that your organization stays compliant.

2
Advanced workflow

Provides tools for simplifying and automating time consuming and challenging workflows.

3
Advanced IT simplification

Lower IT support costs, reduce print related help desk calls and ensure availability of print resources (up-time)

4
Cost transparency

Lower the cost of hardware, print less and be able to allocate cost by department and users for all print activities.

5
Global coverage and reliability

Be assured that with the large global customer base and support coverage, Output Manager keeps your printing secure and productive.
